Translating the help English verb would not be as simple as it could appear at first glance: Would have multiple uses—and in none of them it was readily translated as a single word. Should both be used to indicate tense, as well as to indicate the speaker's attitude to a verb's actions. In any case, the principle of translation is the same: Don't try to translate would as a word; translate it for what it means. One of the most common uses of would is in statements of the type if something were to happen, then something else would happen (or the same thing in a different order, something would happen if something else were to happen first). Almost always, the would in such cases help shape the equivalent of the Spanish conditional tense: Si yo tuviera dinero, invertiría and empresas españolas. (If I had money, I'd invest in Spanish businesses.) Si yo fuera tú, iría al hospital. (If I were you, I'd go to the hospital.) Rebecca ganaría not buena note and esta clase si estudiara más. (Rebecca would earn a good degree in this class if she were to study more.) Si volviera a nacer, dormiría menos y viviría más. (If I were to be born again, I'd sleep less and live more.) It is common in both languages to make statements where the condition is not directly stated. For example, the first two examples below are derived from the first two examples omitted above with the condition: Invertiría and empresas españolas. (I would invest in Spanish businesses.) Yo iría al hospital. (I would go to the hospital.) I don't gustaría taza de kafee. (I'd love to have a cup of coffee.) Soy de los que llorarían como cuando algo muy preciado's pierde. (I'm among those who would cry when something very expensive gets lost.) It is also possible to imply conditions without using the English axle or Spanish si: El asesinato del presidentes sería un crimen de guerra. (The assassination of the president would be a war crime.) Nos costaría mucho comer aquí? (Would it cost us a lot to eat here?) I prometió que saldría conmigo. (She promised me that she would leave with me.) Another common use of would to indicate that something happened as a matter of habit or use. Often you can have the imperfect tense, the past tense spanish that is usually used to refer to actions that occurred over an indefinite period of time. Durante el día trabajaba mucho. (During the day she would work a lot.) Recuerdo que viajábamos casi cada verano a Puerto Vallarta. (I remember that we would travel to Puerto Vallarta almost every summer.) Le exasperaban las quejas de sus hijos. (His children's complaints would exacerbate him.) Cuando ganábamos nadie decía nada. (When we wouldn't win anyone, nothing would say.) Sometimes the negative shape, wouldn't or wouldn't, suggests a refusal to do something. The reflexive verb negarse can almost used: Se neg another estudiar otras alternativas. (He wouldn't study others eso my negué a firm. (Because of that, I wouldn't sign.) I negué a comportarme como un adulto. (I won't act like an adult.) If wouldn't or wouldn't be used as the equivalent of having or haven't, it could be translated using either the imperfect or preterite tense. La radio del coche no my funcionó and ese momento. (The car radio wouldn't work for me at that moment. The preterite is used here because the event occurred at a specific time.) Muchas veces la radio del coche no my funcionaba. (The car radio often wouldn't work for me. The imperfect is used here for a recurring event.) Esa noche no salieron juntos. (That night they wouldn't leave together.) Muchas veces no salían del escritorio hasta entrada la noche. (They often wouldn't leave their desks until the night came.) Often adding would have little meaning to a sentence, but is used to politely make a request. One way to do something similar in Spanish is to use the conditional tense: I darías un minuto y medio? (Would you give me a minute and a half?) Too gustaría ayudarme? (Do you want to help me?) Le comprarías un dulce a su hermanita? (Would you buy a sweet for your little sister?) In sentences of the type, she said she would + verb, the would be translated using either the conditional or imperfect. In this context, there is little difference in the two Spanish tense. I dijo que iría al centro. (She told me she'd go downtown.) I dijo que iba al centro. (She told me she'd go downtown.) I dijeron que todo parecía correcto. (They told me everything would be correct.) My dijeron que todo parecería correcto. (They told me everything would be correct.) Spanish has no help meaning would or used in the same way, and would usually have to be translated using multiple tense. Depending on the context, + verb in English would become either the imperfect, conditional or preterite tense in Spanish. If would not be used to indicate that someone refused to perform an action, the verb negarse could be used. The word like can be translated to Spanish in many ways — and you often can't replace either of them for another. One trick of translating ashes to Spanish often comes down to figuring out how it functions in a sentence and comes up with another way to express the same idea. While the following is not a complete list of ways as use and translation, it includes the most common: One of the most common uses of ash in English is in pairs to indicate that two things or actions are equal. Such comparisons of equality are typically made using the phrase tan... como (where the ellipse represents an adjective or adverb) or tanto... como (where the ellipse represents a noun and tanto changes in shape to the noun in number and match). Nunca and mi vida había sido tan feliz como hoy. (Never in my life have I been as happy as I am today.)

También me enamoré de mi primera maestra, tan locamente como es posible and un niño. (Me too in love with my first teacher, as crazy as possible for a child.) Podrías ganar tanto dinero como usted quieras. (You can earn as much money as you want.) If you have an English sentence with the word if and you can replace as with like (even if some language purists can frown on you doing it), if probably means something like in the way that. Como usually works well as a translation. My gustaría saber si piensas como pienso. (Leave it as it is.) Déjalo como está. (I'd like to know if you think the way I think.) Como saben todos ustedes, el primer punto del orden del día es la elección del presidente. (As you all know, the first item on the agenda is the election of the president.) Como iba diciendo, todo era perfecto. (As I said, everything was perfect.) Kom como si fuera a ser su última vez. (He eats like it's going to be his last time.) Among the other uses for ash is: When because can be replaced for ash, as can usually be translated as porous, although como is preferred at the beginning of a sentence. Learn more details in our lesson about cause: Buscaba agua porque tenía sed. (He was looking for water like he was thirsty.) No pude ver con claridad porque estaba oscuro. (I couldn't see clearly because it was dark.) Como yo no tenía dinero, no pude comprar el coche. (Like I had no money, I couldn't buy the car.) When or when can replace for ash, mientras can be used to indicate that two or more actions occur simultaneously: Mientras estudiaba veía la CNN. (While studying, he watched CNN.) Mientras comíamos, decidí decírselo a todos los que estábamos allí. (As we ate, I decided to tell it to all of us who were there.) When if functions as a representation to introduce a prepositional phrase that functions as an adjective or adverb, it can often be translated as como. The first two of these examples are of adjective use, the second two of unfavorable use. Es retrato de Jonah como joven artista. (It's a portrait of Jonah as a young artist.) Mi vida como un soldado comenzó and 2010. (My life as a soldier began in 2010.) Anda como ladrón and la noche. (He walks like a thief at night.) Estudia como carrera de química. (She is studying as a chemistry major.) Idioms (phrases with what meanings have meanings that aren't necessarily linked to those of the individual words) with ash and general equivalents include: also known as: alias as a result: and consecuas a joke: and bromaas directed: como's indica, según lo indicadoas expected: como era de esperaras far as I'm concerned: and lo que 'n mi respect : como sias needed, as needed : como sea necesarioas of now: por ahora, hasta ahoraas soon as possible: lo antes posibleas such as: tal como (when the following is a single noun), tales como (when a plural noun follows) Como is a common Spanish translation for ash, although situations in which it cannot be used. Mientras can if when used to indicate that actions are taking Simultaneously. Porque can translate as when used as being used to indicate why something happened, especially when if in the middle of a sentence. Sense.
